

Senior Consultant

Job Location: Los Gatos, CA

Job Code: 73QSKP

Job Duties:

Provide business process consulting, application configuration, testing, training, and issue resolution to customers. Specifically, work with client teams to develop and define business process documentation in the context of application flows, and translate these discussions into designs for technical team use during development. Communicate issues, needs, and requirements effectively between business-focused end users and technical staff. Report project status and issues to both client and company project and senior management. Instruct clients in application use. Responsible for supporting and/or frequent visits to east coast clients during client working hours.

Requirements:

Master's degree in Business, Engineering, or related field, and 2 years in the job offered or related business, systems or technical consulting experience. In lieu of a Master's degree and 2 years, employer will accept a Bachelor's degree followed by 5 years of progressive experience. Education/Experience must include the following: 1) 2 years experience preparing and presenting complex technical and functional concepts to clients and prospects; 2) Supply chain consulting; 3) Demand optimization; 4) Technical project management; 5) Client account management; 6) MS SQL; and 7) RFID (radio frequency identification). Must be available to travel to various unanticipated sites throughout the U.S. Telecommuting OK. Any suitable combination of education, training, or experience is acceptable.
